(iii) Stock at least five refills for the use of the fire- extinguishers.

37. Fire Regulations. - (1) The regulations to be followed in case of the fire should be always pasted in some conspicuous place so that all people concerned shall be acquainted with the fire extinguishers.

(2) A report of any fire or alarm of fire, however slight, in the premises shall be at once sent to the Store-Keeper, Public Works Department and to the nearest public station.

38. Lights. - Every portion of the cinema devoted to the use or accommodation of the public and also all out-lets leading outside the cinema including corridors shall be well and properly lighted during every performance and the same shall be lighted until the entire public have left such premises.

39. Additional lights. - All "Exit" signs shall be fitted with an auxiliary bulb capable of properly illuminating the sign; the bulb shall be kept burning throughout the show from a separate circuit controlled by a separate switch.

40. Electric lighting. - (1) Where electric light is reasonably available for use, no other illuminant shall be used for the purpose of the exhibition, the choking coils, switches, and fuses being installed in accordance with the instructions issued by the Electric Inspector from time to time. In any case no illuminant other than electric light or lime light shall be used for such purposes.

(2) The general lighting of the auditorium and exits shall not be controlled solely from within the enclosure.

¹[Provided that the provisions of sub-rules (1) and (2) of this rule shall not apply to "Lok-Chhavi"]

41. Engines, Boilers and Dynamos. - (1) Where electric light is not available, all time light supply tanks, boilers and engines and dynamos with engine used in connection with, the premises shall be placed in ventilated buildings of fireproof construction, and shall be separated from the cinema house and from each other by brick walls and fireproof,

¹ Ins. by No. 11, dated 28.8.1982.

and shall enclosed on one or more sides by external walls. All door ways in such building shall have iron doors.

(2) No coal, coke, wood or other combustible material shall be so stored or placed that it is likely to be affected by the head of the furnace, boiler or heating apparatus.

(3) No petrol driven engines shall be allowed for generating electric current unless they are fixed in a fireproof compartment at least 10 feet from any other building.

(4) Every fly wheel directly connected with an engine or other mechanical power and any part of the machinery which may be dangerous if left unfenced shall be kept securely fenced.

42. Check Boxes. - All Check Boxes shall be fixed and placed in such position that they will not obstruct the exits.

43. Telephone. - Every cinema shall be provided with a telephone where available, which shall be fitted in such place and manner as the licensing authority may direct.

44. Latrines and Urinals. - (1) Every cinema, shall be provided with separate latrines and urinals for the use of males and females. Such latrines shall be respectively to a minimum scale of one and two per hundred seats.

(2) In places where water supply is available water flushed latrines and urinals shall be provided, and where such supply is not available they shall be detached from the main building and shall be maintained in a sanitary condition and shall be drained in a soak pit.

(3) Water flushed latrines and urinals shall discharge into a septic tank or sewer which shall be at least 16 ft. by 3 ft. by 6ft. deep and shall be provided with two main holes with covers, sluge pipes, valves and chambers for cleaning. Effluent from such tank and sewer shall discharge into a soak pit.

(4) Latrines and urinals, shall be constructed and maintained to the satisfaction of the Medical Officer of Health and shall be cleaned and rendered effectively disinfected after each performance.

45. Spittoons. - (1) Every cinema shall be provided to the satisfaction of the Medical Officer of Health with a sufficient number of spittoons in suitable places for the use of the public.

(2) The spittoons shall contain a strong disinfectant and shall be emptied after each performance.

(3) Notices directing the attention of the public to the spittoons shall be provided in prominent places.

46. Enclosure for Apparatus. - (1) The cinematograph machines shall be placed in a permanent enclosure of sufficient dimensions to allow the operator to work freely. The enclosure shall be substantially constructed of fire-resisting materials or lined with the same.

(2) The entrance to the enclosure shall be fitted with a closely fitting door of fire-resisting material suitably placed and opening outwards and all openings, bushes and joints shall be so constructed and maintained as to prevent so far as possible the escape of any smoke into the

auditorium. If means of ventilation are provided they shall not be allowed to communicate direct with the auditorium. The area of the ventilating ducts of the enclosure shall not be less than one percent, of its floor area.

Explanation.- By 'bush' is meant packing inserted in the holes through which the pipes and cables pass in order to render such holes reasonably smoke-proof.

(3) Openings not exceeding six in number shall be permitted in the front, face of the enclosure, the central one of which must not exceed 8 inches square and those on each side 6 inches square. The projector opening must be fitted with a screen of fire-resisting material capable of being actuated both from the inside and from the outside of the enclosure.

(4) The necessary pipes and cables shall enter through efficiently bushed openings.

(5) No. unnecessary combustible material shall be allowed within the enclosure, and as far as possible all necessary combustible material, films and the like, when not in use shall be kept in fireproof receptacles suitable for the purpose.

47. Projector machine. - (1) The cinematograph machine shall be placed on firm supports of fire resisting materials.

(2) The body of the machine shall be constructed of metal or lined with metal and asbestos in which case there must be an air space between the metal and the asbestos lining. The bottom of the machine must form a metal tray which shall be surrounded by a vertical edge at least one inch in depth.

(3) It shall be provided with a metal shutter which shall fall automatically against the film gate, between it and the source of light.

(4) The shutter automatically drop in the event of any accident to the machine or stoppage of the film and shall automatically rise only when the film is in motion for the purpose of projection.

(5) The film gate shall be of massive construction and provided with ample heat radiating surface and passage for the film shall be sufficiently narrow to prevent half travelling upwards or downwards from the light opening.

(6) All cinematograph projectors shall be fitted with two metal film boxes of substantial construction and more than 17 1/2 inches in diameter, inside measurement to and from which the films shall be made to travel.

(7) Such boxes shall be of approved construction, shall be made to close in a manner which prevent the ingress of fire and shall be fitted

with a film slot so constricted as to prevent the passage of flame to the interior of the film box.

(8) Spools shall be chained or gear driven and films shall be wound upon spools so that the wound film shall not at any time reach or project beyond the edge of the flanges of the spool.

(9) All films when not in the cinematograph machine and while still in the enclosure, shall be contained in closed metal boxes.

48. Electric Installation inside the enclosure. - (1) Within the enclosure the insulating material of all electric cables, including those leading to illuminating lamps, shall be covered with fire-resisting material. If the electric pressure to the cabin exceeds 125 volts, all cables inside the cabin shall be enclosed in screwed metal conduits connected to the earth. Lead covered cables shall not be used unless enclosed in such conduits. No electric current at a higher pressure than 110 volts shall be used within the enclosure when a cinematograph apparatus is working:

¹[Provided that an electric current at a pressure of 230 volts may be used in a cinema, if special precautions to be decided by the Electric Inspector have been undertaken under his directions. This proviso shall apply to those equipments which have been in operation prior to the coming into force of these rules.]

(2) The cables for the cinematograph machine shall be taken as a separate circuit from the source of supply and from the supply side of the main fuses in the general lighting circuit on the premises and there shall be efficient switches and fuses inserted at the point where the supply taken and in addition an efficient double pole switch shall be fitted in the cinematograph lamp circuit inside the enclosure.

(3) Resistance frames shall be entirely of fire resisting material and shall be so constructed and maintained that no coil or other part shall at any time become unduly heated. All resistance with the exception of resistance for regulating purposes shall be placed outside the enclosure and if reasonably practicable outside the auditorium if inside the auditorium they shall be adequately protected by a wire guard or other efficient means of preventing accident contract. They shall not be permitted to become so heated that a piece of dry newspaper placed in contact with any part of resistance would readily ignite.

49. Provisions relating to use of limelight. - (1) If limelight is used in the cinematograph lantern the oxygen and hydrogen gas shall be contained in cylinder and each such cylinder shall be accompanied by a certificate signed by the manufacturers to the effect that it has been tested and filled in conformity with the requirements set out

¹ Added by Amending Notification No.2, dated 3-6-1961.

in the schedule. The tubing shall be sufficient strength to resist pressure from without and shall be properly connected up.

(2) No gas shall be stored or used except in containers in accordance with the requirements contained in the schedule.

(3) No ¹[ether or volatile and inflammable liquids shall be employed under any circumstances for producing light.

50. Fire precautions in the enclosure. - (1) Two liquid chemical extinguishers ²[one fire extinguisher using carbon tetrachloride acid] one bucket of sand, two buckets of water and a damp blanket shall be kept inside the enclosure. A large sponge shall be kept in one of the buckets of water. One liquid chemical extinguisher shall also be kept immediately outside the enclosure.

(2) No smoking shall at any time be permitted within the enclosure or the auditorium.

51. Winding Rooms. - (1) The winding room shall be constructed entirely of fire-resisting materials and shall be large enough to allow the winder to operate freely. It shall be [constructed] apart from the projection room and auditorium, but the licensing authority may for reasons to be recorded, permit the winding room to adjoin the projection room. The winding room shall have no openings in the wall so as to permit communication with the auditorium or public passage ways.

(2) The winding room shall be closed by a closely fitting self-closing door of fire-resisting materials which shall only be open for ingress and egress and shall remain closed during the entire period that the cinematograph exhibition is in progress. Suitable arrangements shall be made for ventilation in the winding room and one or more electric fans of suitable dimensions shall be provided by the licensee.

(3) Only electric lines shall be used in the winding room and any lamps in proximity to the film shall be closed in a stout fitting design to prevent breakage of the bulb.

(4) The spools shall be chain or gear driven and films shall be so wound upon the spools that the wound film shall not, at any time, reach or project the edges of the flanges of the spool.

(5) The winding of films shall not be carried out in the projection room while an exhibition is in progress.

(6) Excepting a film which is being wound or stored, no inflammable article shall unnecessarily be taken into or be allowed to remain in the winding room.

(7) All cinemas in permanent buildings shall without exception, be required to provide and use a winding room in accordance with the above requirements.

(8) Not more than 200 lb. of explosive cinematograph film shall be stored in the premises to which this licence relates, unless a specific licence has been obtained from the Chief Inspector of Explosives in the India as required by the Cinematograph Films Rules, 1948.
